Instruction

(for use with ground coffee)

1. Before using car coffee machine, make sure that the vehicle stationary, the parking brake engaged and engine turned on.
2. Hold the car coffee machine, open the cover anticlockwise.
3. Remove the ground coffee funnel.
4. Fill the water reservoir with approx.45ml water. Watch the MAX water level and ensure the water not exceed it.
   Beware: Do not use the car coffee machine without water in the water reservoir!
5. Put the ground coffee funnel back to the water reservoir machine with no deflection.
6. Prepare your coffee dose by filling the funnel evenly with the ground coffee(about 7g). Please check the ground coffee does not exceed the upper edge of the funnel.
7. Close the coffee container by rotating it 60 degrees clockwise.....up to the locking indicator.
8. Push the red block by the side of the coffee container to the cover locking sign.
9. Install the car coffee machine vertically in the cup holder.
   Beware: To ensure the safety, the coffee machine should be used in the cup holder only.
10. Plug the power cord to a 12V cigarette lighter plug. The light of the ON button will turn from red to blue, then turn off soon.
11. Press the ON button to start the heating of the machine. The red light will turn on.
12. Wait about 5 minutes, the motor start working. After 1 minute, you can hear a bleep sound and see the blue light flashing. That means the coffee finished.
13. Unplug the power cord.
14. Take the Car coffee machine out from the cup holder.
15. Slide the cover lock to the unlocking position.
16. Press the open button and the cover will turn on automatically.
17. Hold the coffee machine body and pour the coffee to a prepared coffee cup. Enjoy your espresso.
18. Wait for 5 minutes until the body not hot. Re-open the coffee container by rotating it anticlockwise. Remove and dispose the used ground pods, clean the disk filter with blush and water, then put the car coffee machine back to the storage position.

To prepare the second espresso, go back to step 2.
